49	Letter from the Bishop of Guadalajara to Charles III of Spain on the expulsion of the Jesuits, the 1767 Revolt and the evangelization of
	northwest Mexico and California
	[20] pp. on five 4-page conjugarte folios numbered 13 through 17 (lacking sheets 1 through 12 and at least one concluding sheet). Ink
	manuscript. 30.3x21 cm (12x8¼"), unbound, in custom cloth & boards
	folder.
	Est. 4,000 - 6,000
50	Three original manuscript letters and one accompanying manuscript
	document on the defense of the northernmost Spanish territories of New
	Spain against the United States and the indigenous Apache and Comanche people
	Comprises:Letter from Nemesio Salcedo to Miguel Constanzó
	congratulating him on his promotion and about some problems with his
	"American friends". Chihuahua, July 28th, 1804. 1 ff. He gives news
	about some problems caused by his "American neighbors", which had
	been at peace till now as a result of the rulings that were issued (and
	against his own ideas). He tells they have trespassed the territory and have been detained in New Mexico. He expects to be informed about
	everything on his return, and hopes they are not sent back to their own
	country before a lesson is taught to those who disobey the rules,
	ignoring the borders they have been assigned in the territories.
	"Chihuahua, July 28th, 1804. Salcedo [signature and rubric]".Letter from
	Nemesio Salcedo to Miguel Constanzó regarding his advancements in the teaching of geography and the marking of the territory, and the
	design of weapons for the cadets, and request for material. Chihuahua,
	July 3rd, 1810. 1 ff. Salcedo informs Constanzó that he has decided to
	impart basic instruction, founding schools in all forts and military posts,
	assigning with good results teachers and students according to their
	efforts and learning. He is conscious that the knowledge and use of
	geography and maps is important for war. Because of this he has started an academy for cadets to teach them how to draw the terrain
	and use various notes and drawings. He says that he attaches a map
	(not found) to demonstrate how useful this is. He says he is in much
	needs of an engineer, and that they have manufactured good quality
	shotguns that have armed 700 men. However, they are at the mercy of
	the commissioners from Mexico, who send iron without caring for its
	quality. He tells he successfully tested in the field a small cannon. He requests more cannons, as well as munition and bullet cases, but they
	must be easy to load and unload. "Chihuahua, July 3rd, 1810. Salcedo
	[signature and rubric]". Note from Constanzó: "Received on Monday 23
	of this month".Letter from Nemesio Salcedo to Miguel Constanzó about
	the design and use of a mountain cannon, with detailed designs and
	sketches of the cannon. Chihuahua, August 27th, 1810. 1 ff., 1 bifolio, illustrations, 1 ff.Salcedo gives thanks for the remittance of items (to
	calculate angles) and he says he will deliver these to the poorest among
	the cadets. He reports about the mountain cannons, the design of which
	he attaches as #2, and he asks Constanzó to examine the design and
	change it as he wishes. He laments the lack of men of science, who are
	able to work with their hands and tools, follow instructions and teach
	others. He says that document #3 shows the caliber of the test cannon.  In a note added later, he comments that his is very bored, and that in
	Texas the Comanches roam, and they are mean enemies. "Chihuahua,
	August 27th, 1810. Salcedo [signature and rubric]". Recipient: "Señor
	don Miguel Constanzó."Housed together in custom cloth & boards
	folder.
